KIAH MANDALIYA

kiahdmandaliya@gmail.com | +91 81408 00042 | Portfolio | LinkedIn | GitHub

Education

Institute of Technology, Nirma University June 2024 – 2028
B.Tech in Computer Science & Engineering (Currently in 5th Semester)

- **CGPA: 8.77/10**
- **Coursework:** Data Structures and Algorithms, Object Oriented Programming, Operating Systems, Database Management Systems, Machine Learning, Statistics, Java, Computer Architecture, Data Communication

Research

Comparative Evaluation of Machine Learning and Deep Learning Approaches for Attack Detection in the Internet of Medical Things (IoMT)
Accepted at ICTCS 2026, Ahmedabad

Technical Skills

Languages: C/C++, Python, JavaScript, HTML/CSS, Java

Frameworks/Libraries: ReactJS, FastAPI, Flutter, Scikit-learn

Tools/Platforms: Git, VS Code, Linux (Ubuntu), Docker, Supabase, Render, PostgreSQL, n8n, MATLAB, vLLM, Hugging Face

Experience

WorldQuant BRAIN – *Research Consultant* September 2026 – Present

- Built an automated **Python pipeline** that loads data from the BRAIN platform, uses LLMs to filter candidate alphas, and then simulates the shortlisted alphas.

Bonrix Software Systems – *AI/ML Intern* June 2026 – July 2026

- Optimized Qwen2.5-7B-Instruct for long context inference using vLLM and FP8, supporting a **128K-token** context window and shared context up to **300 KB**.
- Built ContextGPT using ReactJS and FastAPI, and deployed it on Podstack cloud GPUs for testing with **3+ concurrent users**.

ScaleTech – *Software Development Intern* June 2025 | Demo

- Developed a Truck Routing Optimization Web App using ReactJS, FastAPI, and PostgreSQL, tested across **50 customer locations** in Ahmedabad for a two-truck delivery scenario.
- Applied K-Means clustering, OSRM, and Google OR-Tools to cluster customer locations and generate optimized delivery routes.

Projects

LabelLens: Product Label Analyzer GitHub | Demo

- Built a Flutter-based mobile app using Google ML Kit(OCR) to extract ingredients from product labels and personalized analysis to identify potentially harmful substances, verify marketing claims, recommend safer alternatives, and support voice-based chatbot interaction.
- **Technologies:** Flutter, FastAPI, Supabase, Google ML Kit, Groq API, TTS/STT

CareerLens: Job Market Analytics Platform GitHub

- Built job analytics platform that scraped and analyzed nearly **19,000 live job**

listings from LinkedIn and Naukri to identify skill-demand and AI-risk trends, recommend reskilling paths, and answer career queries using RAG.

- **Technologies:** ReactJS, Python, FastAPI, BeautifulSoup, PostgreSQL, RAG-based chatbot

Achievements

- **Smart India Hackathon 2025:** Selected among the **Top 50** teams in the Primary Round for the RASA-based rural information chatbot ASHASaathi for ASHA workers.
- **Innovate Bharat Hackathon 2026: Finalist** for LabelLens.
- **WorldQuant International Quant Championship 2026:** Reached **Gold Level**.
- **ISRO Hackathon 2026:** Qualified for **Round 1** for Infrared Image Colorization and Enhancement.
- **LeetCode:** Maximum rating of **1480**.

Extracurricular Activities

- *Treasurer*, **IEEE Intelligent Transport Systems Society**, Nirma University
  - Managed events at IEEE Carnival, a three day inter-college event, overseeing budgeting, expense tracking, event photography, and sponsor outreach.
- Built a three-road traffic-light control system using Arduino Uno and LEDs, implementing signal timing and sequencing to simulate real-world traffic.
- *Vice President*, **Data Science Club**, Nirma University.
- *Member*, **Association for Computing Machinery** and **Computer Society of India**, Nirma University.
