Objective

Passionate about applying academic knowledge to real-world projects, with a growing interest in Artificial Intelligence and Agentic AI systems. Actively exploring machine learning and strengthening skills through competitive programming. Eager to learn emerging technologies and contribute to innovative solutions through hands-on internships and collaborative work.

Education

Institute of Technology, Nirma University, B.Tech in Computer Science & Engineering

June 2024 – Present

- **Current Semester:** 4th
- **GPA:** 8.90 /10
- **Coursework:** Computer Programming(C/C++), Introduction to AI/ML, Introduction to web programming, Object Oriented Programming, Data Structure and Algorithms, Java, Operating System, Database Management System, Digital Electronics, Computer Architecture

Technical Skills

Languages: C/C++, Python, JavaScript, HTML/CSS, ReactJS, MATLAB, Java

Tools: Git, Visual Studio Code, Kaggle, Linux(Ubuntu)

Others: FastAPI, Flutter, PostgreSQL, MS Office, n8n, Docker, Supabase, Render

Projects

Truck Routing Optimization Web App

Internship at ScaleTech

- A full-stack web application for optimizing truck delivery routes using React.js (frontend), FastAPI (backend), and Machine Learning.
- The system clusters customer locations using KMeans, fetches real-world distances via OSRM, and solves the Vehicle Routing Problem (similar to Travelling Salesman Problem) with OR-Tools.
- Language & Tools Used: ReactJS, Python(FastAPI), PostgreSQL

Numerology Calculator

- Created a basic numerology calculator that lets users find numbers like Birth Number, Life Path Number, and Personality Number using their name or birth date, based on Chaldean numerology.
- Language & Tools Used: C

Shopping Website

- Created a responsive clothing website with user sign-in/sign-up toggle functionality. Focused on intuitive layout and seamless user navigation.
- Language & Tools Used: HTML, CSS and Javascript

Fitness Tracking Website

- Developed a fitness planning platform with sign-in functionality, workout customization, and BMI calculator.
- Language & Tools Used: HTML, CSS and Javascript

KNN Classification Model

- Applied K-Nearest Neighbors algorithm to classify Wine quality

- Language & Tools Used: Python, Scikit

Hackathons and Achievements

Innovate Bharat Hackathon 2026 - Finalist

GitHub Repository

- Built an AI-powered mobile application to analyze product labels by extracting ingredient data and generating safety insights for users.
- Developed a Flutter-based cross-platform app with a FastAPI backend, integrating personalized analysis based on user factors like allergies and sensitivities.
- Implemented features such as harmful ingredient detection, claim verification, safer alternative suggestions, and an AI chatbot with voice support (TTS/STT) for accessible interaction.

HackaMined (National Level Hackathon) 2026

- Built a real-time job market analytics platform by scraping job listings from LinkedIn and Naukri using BeautifulSoup and storing structured data in PostgreSQL.
- Developed FastAPI-based backend APIs to process job data and generate insights such as job trends, in-demand skills, and AI vulnerability risk metrics.
- Implemented a user analysis layer that recommends reskilling paths and estimates automation risk based on profession, experience, and skills; integrated a RAG-based chatbot using the Ollama API for personalized career queries.
- **Technologies:** Python (FastAPI), BeautifulSoup(Live Scraping), PostgreSQL, RAG based chatbot, Ollama API

Smart India Hackathon 2025 – Primary Round Finalist

- Developed a prototype RASA-based conversational chatbot for rural communities, enabling accessible information delivery. Integrated the chatbot with Twilio for real-time SMS/WhatsApp messaging.
- **Technologies:** Python(FastAPI)

Codeforces – Max Rating: 922 (Newbie)

- Active competitive programmer, participating in rated contests and improving problem-solving skills in algorithms and data structures.

WorldQuant - International Quant Championship 2026

- Successfully qualified Stage 1 of the global quantitative finance and data science competition organized by WorldQuant.

Certifications / Online Courses

- Machine Learning program - Finlatics (Jan-Apr 2025)

Extracurricular Activities

- Treasurer, IEEE- Intelligent Transport System Society, Nirma University
 - Managed the ITSS chapter event at **IEEE Carnival** — a 3-day inter-college event hosted at Nirma University; oversaw budgeting, expense tracking, event photography, and sponsor outreach.
- Graphics Team Executive Member, Data Science Club, Nirma University
- Member, Association for Computing Machinery, Nirma University
- Member, Computer Society of India, Nirma University
- Built a three-road traffic light control system using Arduino Uno and LEDs, implementing signal timing and sequencing to simulate a real world traffic.
- Participation in Model United Nations (MUN)
- Volunteered at "Vaudeville 2025" (Annual Cultural Fest)
